## Mobile apps

Find instantly the urBox closest to you!

Free download for iPhone and Android.

# urBox story

The urBox was born from three urban entrepreneurs wishing to offer sustainable secure box solutions to owners and users of two-wheelers.

**Sébastien and Florent** have been working in the sector for years of construction and energy. They bring their know-how and their creativity in the creation of modular spaces.

**Guillaume** is one of the first to have proposed and marketed the QRcode in France. To cope with the increase in acts damage and theft in urban spaces that have become real saturated zones, it provides innovative solutions and its commercial know-how

From their association was born the idea of creating the urBox: a secure space for all two-wheels that blend into the urban landscape.
